WEEK-END ASSIGNMENT-07

Pointers, m-D array and Dynamic Memory Allocation

Operating Systems Workshop (CSE 3541)

Problem Statement:

Experiment with pointers, 1-D & m-D array processing through pointers and dynamic memory allocation in C.

Assignment Objectives:

To learn how to manipulate arrays using pointers and to learn **malloc**, **mcalloc**, **realloc** & **free** to allocate and free dynamic memory.

Instruction to Students (If any):

Students are required to write his/her own program by avoiding any kind of copy from any sources. Additionally, They must be able to realise the outcome of that question in relevant to systems programming. You may use additional pages on requirement.

Programming/ Output Based Questions:

1. Consider the following ANSI C program;

```
#include<stdio.h>
int main() {
   int arr[4][5];
   int i,j;
   for(i=0;i<4;i++) {
      for(j=0;j<5;j++) {
        arr[i][j]=10*i+j;
      }
   }
   printf("%d\n",arr[2][4]);
   printf("%d\n",*(*(arr+2)+4));
   return 0;
}</pre>
```

2. Consider the following ANSI C program;

```
#include<stdio.h>
int main() {

      for(j=0;j<5;j++) {
        arr[i][j]=10*i+j;
      }
}
printf("%d\n",*(arr[1]+9));
return 0;
}</pre>
```
